100% CERTIFIED

Organic cotton is the fiber what is produced under a system of organic farming and that is processed, packed, transported and stored as to maintain segregation and prevention of contamination from other fiber and from synthetic pesticides , prohibited defoliants of desiccants. Because of this, the cotton plant grow slowly and produce nice, strong fibres from which beautiful and strong fabrics can be made. The cotton is not only better for the environment, but also good for the skin. This type of cotton has a fine thread that is extra soft to the touch and is Global Organic Textile Standard certified.
